## NEWS RELEASE

### An eye to the future with Visual-Patch™

Artistic Licence is pleased to announce the very latest cutting edge technology for the lighting industry: Visual-Patch.

Visual-Patch takes the drudgery out of lighting. No more patching, no more start addresses, no more head scratching!

It is often said that the best inventions are the simple ones and that's true with Visual-Patch. We have combined the power of the new Remote Device Management (RDM) protocol, a lighting console and a video camera.

Simply point the camera at the stage and press the Visual-Patch button. The lighting console uses RDM to switch each lamp on in turn. It analyses the position, shape and size of the lamp using the video camera, adds it to the patch and automatically sets the lamp start address.

The result: You get a short coffee break whilst the console builds your patch, then go straight to show programming!

The first product to implement Visual-Patch is Colour-Tramp. Colour-Tramp is a lighting console optimised for control of two and three dimensional arrays of colour changers. Visual-Patch allows large arrays of pixels to be mapped and patched with ease. This is of particular benefit in random pixel arrangements such as 'video on star cloth' applications.

The world premier of this cutting edge technology is at booth 3138, LDI Las Vegas.

Patents pending worldwide. Visual-Patch is a trade mark of Artistic Licence (UK) Ltd.

### About Artistic Licence:

Since 1988, Artistic Licence has specialised in the design, development and manufacture of products for the entertainment technology industry. The product range encompasses DMX512-A, RDM, Ethernet, Art-Net and MIDI. The range extends from test equipment to data distribution and motion control to LED lighting.

This vast range of products has evolved from years of experience in solving technical problems. At Artistic Licence, no job is too large or too small and no technology is too old, new or complex.

The Artistic Licence Special Projects department provides a unique service by offering the entire product range as building blocks for custom development. Why reinvent the wheel when you can turn to Artistic Licence!

The product line is available throughout the world via a growing number of progressive dealers, a list of which is available from our web site: [www.ArtisticLicence.com](http://www.ArtisticLicence.com)

Visitors to our website can also order on-line and download technical data and user guides.

Ends.
