

# candlePower pre-commissioning form

candlePower pre-commissioning is a service that includes:

- Set the start address of each channel
- Set the personality (curve) of each channel
- Set the dim mode and current of each channel
- Set the PWM output resolution and modulation frequency of the product
- Upload 4 x curve files from the [library](#)

Please fill in the interactive blue boxes below, save the pdf and email it to:

# candlePower pre-commissioning form

Please select the PWM frequency (applies to all channels and determines resolution):

Please type/select the other attributes (per channel) in the chart below:

Item	Ch1	Ch2	Ch3	Ch4	Ch5	Ch6	Ch7	Ch8	Notes
<b>Start address</b>									Enter number in range 1-512. Each channel may have a different start address.
<b>Personality</b>									Select curve personality 1-4 (as determined by chart on previous page) or 5 for 16-bit
<b>Dim mode</b>									Select Constant Current or Constant Voltage
<b>CC current</b>									Only enter this data if you have selected CC dimming mode
<b>CV trip</b>									Only enter this data if you have selected CV dimming mode
